C++

Object-Oriented Programming (OOP)

# Shaariff Mujtaba

Pursuing Computer Science at Bahria University E-8  
Islamabad, Islāmābād, Pakistan

## Summary

I am a Computer Science undergraduate at Bahria University, Islamabad (E-8 Campus), currently entering my second year. Over the past year, I have built a solid foundation in C++ (OOP), logic building, and problem-solving, which I've applied in projects ranging from game development to web design.

My career goals are to become a Data Scientist and a Web Developer, combining programming, analytical thinking, and creativity to solve real-world problems.

## Projects & Experience:

**Chess Game (C++ & SFML):** Built a two-player chess game using OOP concepts and the SFML library, applying structured design and complex game logic.

**Gym Website:** Designed and developed a responsive front-end using HTML, CSS, and JavaScript, focusing on user experience.

**WordPress Websites:** Delivered two professional websites—one for a major client (UMER PBX on Instagram) and another for a brand launch—showcasing my ability to meet client needs with practical solutions.

## Skills:

**Programming:** C++ (OOP), JavaScript

**Web Development:** HTML, CSS, JavaScript, WordPress

**Tools & Libraries:** SFML, CMS platforms

**Strengths:** Analytical thinking, logic building, adaptability, and problem-solving

## What Drives Me:

I am motivated by curiosity and a growth mindset. I see every project as an opportunity to learn, improve, and add value—whether by writing efficient code, creating a seamless user interface, or exploring new technologies.

I believe in collaboration, client focus, and continuous learning, and I am eager to apply my skills in real-world environments while expanding my knowledge in data science, machine learning, and full-stack development.

---

## Experience

### Freelance

#### Wordpress Developer

July 2025 - Present (8 months)

Islāmābād, Pakistan

#### UMER PBX (Client Project) – Remote

Jul 2025 – Jul 2025

Designed and developed a custom WordPress website for a client with a large Instagram presence (@umerpbx).

Delivered a responsive, mobile-friendly design that aligned with the client's branding and audience needs.

Optimized the website for professional presentation and easy navigation, helping strengthen the client's digital presence.

### Freelance Web Developer

#### Brand Launch Project (Naqsh) – Remote

Jul 2025 – Jul 2025

Created a WordPress website for a friend's brand, supporting their online launch.

Focused on clean design, intuitive navigation, and user experience to reflect the brand's identity.

Ensured the website was easy to manage and update for long-term use.

Helped establish the brand's visibility and credibility through a professional web presence.
